

CIRCA

1976 by Massmi

In the Circa collection, the glass provides the mood lighting. Its silhouette and volume lend this flushmount lamp an air of refinement, whether it is installed on the ceiling or the wall. Made of triplex opal glass, Circa lamps give off a subtle, suggestive light. Available in two shapes and three sizes, the Circa collection allows for a great variety of applications and combinations, either in private homes or larger settings, and is perhaps our most versatile collection.

En Circa todo el vidrio se convierte en emisor de luz ambiente. Su perfil y su volumen, nos recuerda que estamos ante un plafón ya sea colocado en techo o en pared de presencia, discreta y refinada. Circa está fabricada en cristal Triplex opalizado y el efecto de luz tamizada es muy sugerente. Sus seis versiones permiten gran variedad de aplicaciones y combinaciones, diseñada para ambientes decorativos, instalaciones y hogares, se trata de un producto muy versátil.
